Daleel Assembly Copilot

AI-Powered Precision for Manufacturing

Transform your assembly processes with AI-driven accuracy and efficiency. Daleel Assembly Copilot is your trusted partner for smarter manufacturing.

Solve Critical Assembly Challenges

Human Errors and Skill Gaps

Mistakes due to exhaustion, lack of guidance, or inexperience, especially for new operators, leading to inefficiencies and rework.

Inaccurate Assembly and Quality Issues

Incorrect part sequencing, dimensional inaccuracies, and inconsistent quality across batches due to insufficient monitoring and real-time feedback.
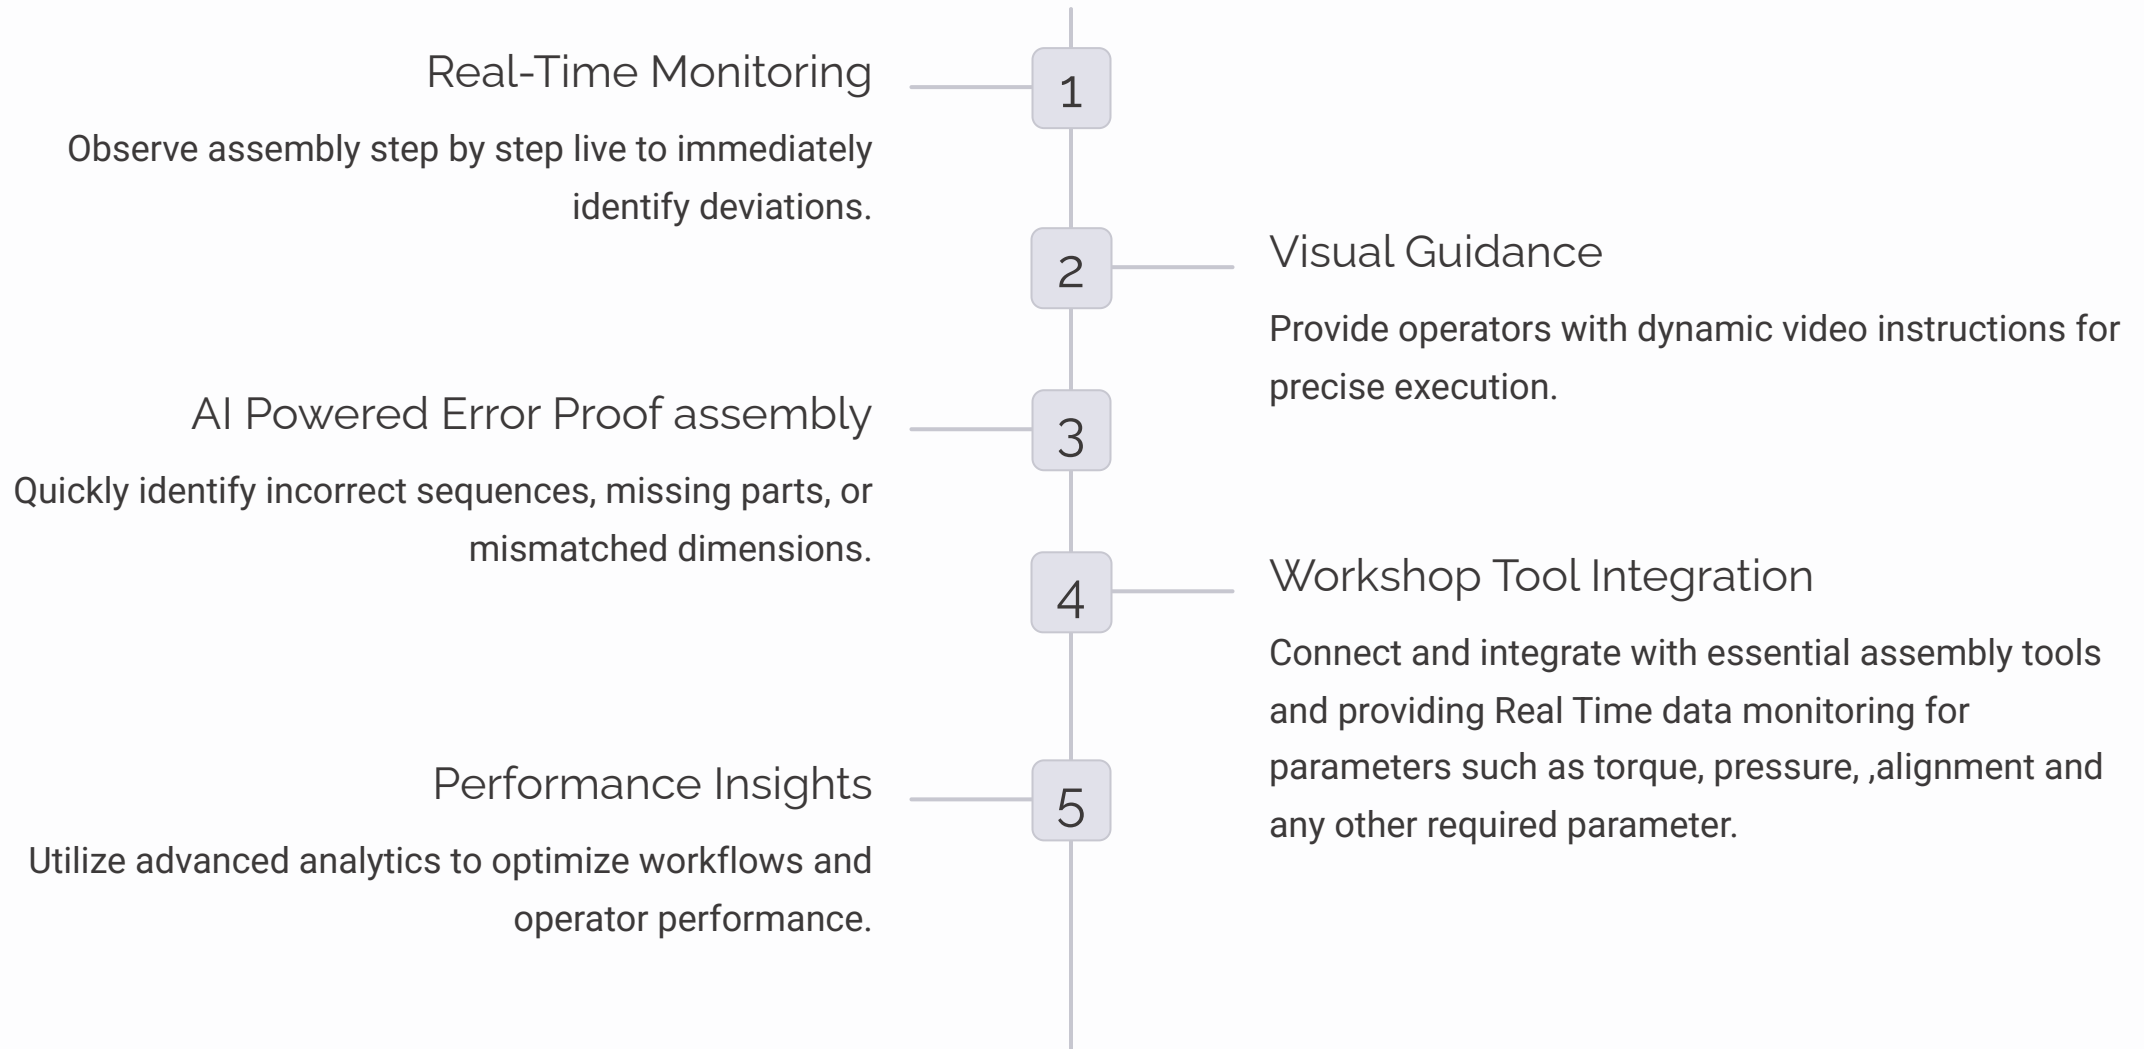

Inefficient Processes and Downtime

Time wasted on manual checks, disconnected systems, and errors causing production delays, increased downtime, and higher operational costs.
Material Waste and Cost Overruns

Errors leading to repeated corrections, material scrap, and Increasing expenses, impacting overall profitability.

How Daleel Works

Real-Time Monitoring

Observe assembly step by step live to immediately identify deviations.

1

2

Visual Guidance

Provide operators with dynamic video instructions for precise execution.

AI Powered Error Proof assembly

Quickly identify incorrect sequences, missing parts, or mismatched dimensions.

3

4

Workshop Tool Integration

Connect and integrate with essential assembly tools and providing Real Time data monitoring for parameters such as torque, pressure, ,alignment and any other required parameter.

Performance Insights

Utilize advanced analytics to optimize workflows and operator performance.

5

Optimize your Process with Real Time data

Plug-and-Play Solution

Our system is built with an **easy-to-use interface** that makes getting started simple. It's a true **plug-and-play solution**, powered by **machine vision** to guide you through a **step-by-step process**. With **time cycle tracking** and enable to integrate into your existing software, it's designed to save you time and effort while increasing efficiency.

Real Time Data

Daleel **integrates** efficiently with standard tools, including **barcode scanners**, **light towers**, **smart torque wrenches**.

Core Benefits

AI-Guided Accuracy

Ensure every assembly step is performed correctly with real-time monitoring.

Customizable Instructions

Adapt guidance to meet the specific needs of each unique assembly process.
Integrated Processes

Connect with your current systems to digitize and improve assembly workflows.
Actionable Analytics

Use data-driven reports to increase efficiency and maintain high quality.
Proven Business Impact

86.7%

## Cost Savings

Reduce Scrap Cost by 86.7%

80%

Error Reduction

Reduce assembly errors by 80%, minimizing defects and ensuring consistent product quality.
50%

Efficiency Improvement

Achieve up to 30-50% improvement in workflows by reducing downtime and streamlining assembly processes.

60%

Training Time Cut

Cut training time by up to 40-60%, enabling faster onboarding of new operators and reducing reliance on skilled labor.

25%

Enhanced Process Optimization

Gain actionable insights from real-time data, leading to up to 20-25% improvement in process optimization and decision-making.

Optimize Processes and Eliminate Bottlenecks

Time Savings

Identify inefficiencies and streamline workflows to save time and reduce costs.

Enhanced Assembly Design

Improve assembly design and workflows for better efficiency.

Actionable Analytics AI Powered

Use performance insights to pinpoint and resolve bottlenecks.

Ready to Transform Your Assembly Line?

Daleel Assembly Copilot is more than an upgrade—it represents the future of manufacturing. Reduce waste, enhance precision, and boost efficiency with a solution tailored to your needs.
